CONTENTS

2nd IoM Steel Division Annual Meeting (papers from Session 4)

7 ***Keynote address*** **The impact of minimills in the USA** J. Astier

13 **The Tuscaloosa Steel project** P. Waterhouse

15 **Trico LLC – configuration and early operating experiences** I. Harris

3rd Annual Seminar of EPSRC Engineering Doctorate Centre – Wales (papers 1–8)

27 **Editorial**

29 **Control of effluents in steel production: wastewater discharges at British Steel Port Talbot** S. P. Swindley, J. Charles, D. Shillaker, and K. Williams

33 **Practical application of learning classifier system for downcoiler decision support in steel hot strip mill** W. N. Browne, K. M. Holford, C. J. Moore, and J. D. Bullock

42 **Development of predictive model for monitoring condition of hot strip mill** K. B. Goode, B. J. Roylance, and J. Moore

47 **Rapid annealing of dual phase steels** D. J. Hillis, D. T. Llewellyn, and P. J. Evans

55 **Effects of coiling temperature and continuous annealing variables on final properties of drawn and wall ironed tinplate steel** S. C. Ball, D. T. Llewellyn, and N. D. Jenks

63 **Testing techniques for cold work embrittlement in interstitial free steels** S. G. Lewis, S. R. Daniel, J. D. Parker, D. T. Llewellyn, and M. P. Sidey

74 **Applicability of finite element method to design and optimisation of food cans** I. B. Jones, D. R. J. Owen, D. Jones, A. J. L. Crook, and G. Q. Liu

81 **Finite element modelling of camber development during hot rolling of strip steel** D. L. Biggs, S. J. Hardy, and K. J. Brown

3rd Annual Seminar of EPSRC Engineering Doctorate Centre – Wales (papers 9–11)

117 **Investigation into magnetic wiping techniques as alternative to gas wiping on hot dip galvanising lines** C. Lloyd-Jones, H. A. Barker, and V. J. Worner

124 **Measurement of coatings and surface oxide layers on grain oriented electrical steel** M. J. Davies, A. J. Moses, and D. Snell

131 **Effect of low cost press tool materials on formability of sheet steel** D. Cartwright, P. R. Drake, and M. J. Godwin

---

137 **Evaluation of alternative cheap fuels for injection in SAIL blast furnaces** R. Athappan

144 **Phosphorus partition ratio and phosphate capacity of Na_2O–SiO_2 at 1400°C** J. O. Borode

150 **Full rotation model of single roll continuous sheet casting process** M. R. R. I. Shamsi and S. P. Mehrotra

159 **Roll load measurements on thin slab caster for liquid core detection** K. Mörwald, J. Watzinger, and R. J. O'Malley

163 **Electric arc furnace monitoring and data analysis techniques** B. A. Chiappelli

168 ***Technical note*** **Deoxidation and strengthening of steels using Fe–Ti–C master alloy** K. C. Malla, A. K. Chakrabarti, and R. K. Galgali

178 ***IoM Presidential Address*** **'It's your future: take it'** J. W. Edington

3rd Annual Seminar of EPSRC Engineering Doctorate Centre – Wales (papers 12–14)

199 **Application of artificial intelligence techniques to resistance spot welding** J. D. Brown, M. G. Rodd, and N. T. Williams

205 **Factors affecting torsional properties of box sections** T. Pine, M. M. K. Lee, and T. B. Jones

210 **Corrosion resistance of Zn–Al alloy coated steels investigated using electrochemical impedance spectroscopy** H. N. McMurray, G. Parry, and B. D. Jeffs

---

217 **Microtexture control step for interstitial free steel** M. Caul, V. Randle, and M. Pichilingi

222 **Properties of iron bearing materials under simulated blast furnace indirect reduction conditions: Part 1 Review and experimental procedure** C. E. Loo and N. J. Bristow

233 **Production of low silicon hot metal: theory and practice** B. D. Pandey and U. S. Yadav

239 **Improvement of inner quality of continuously cast billets using electromagnetic stirring and thermal soft reduction** P. Sivesson, G. Hällén, and B. Widell

261 ***Opening address*** **Competitiveness through creative product development** J. W. Edington

273 **Studies in development of clean steels: Part 1 Modelling aspects** G. J. Hassall, K. G. Bain, R. W. Young, and M. S. Millman

279 **Studies in development of clean steels: Part 2 Use of chemical analyses** D. J. Dyson, A. J. Rose, M. M. Whitwood, and D. P. Wilcox

287 **Properties of iron bearing materials under simulated blast furnace indirect reduction conditions: Part 2 Reduction degradation** C. E. Loo and N. J. Bristow

296 **Formation mechanism of silicoferrite of calcium and aluminium in sintering process** S. Wang, W. Gao, and L. Kong

303 **Prediction of channelling caused by breakthrough of cohesive zone in blast furnace** S. H. Yi, B. R. Cho, and C. H. Rhee

309 **Experimental studies of viscosities in Fe_nO–MgO–SiO_2 and Fe_nO–MnO–SiO_2 slags** F.-Z. Ji, Du Sichen, and S. Seetharaman

317 **Reduction of electric arc furnace slags in stainless steelmaking: Part 1 Observations** M. Görnerup and A. K. Lahiri

323 **Dynacs® cooling system – features and operational results** K. Mörwald, K. Dittenberger, and K. D. Ives

347 ***Historical metallurgy*** **Edgar Allen and Co. Ltd** C. Bodsworth

355 **Neural network analysis of steel plate processing** S. B. Singh, H. K. D. H. Bhadeshia, D. J. C. MacKay, H. Carey, and I. Martin

366 **Properties of iron bearing materials under simulated blast furnace indirect reduction conditions: Part 3 Reducibility** C. E. Loo and N. J. Bristow

374 **Effect of slag on carbon bearing MgO refractories** J. Pierard, Du Sichen, P. Jönsson, S. Seetharaman, and T. Landin

382 **Reduction of electric arc furnace slags in stainless steelmaking: Part 2 Mechanism of CrO_x reduction** M. Görnerup and A. K. Lahiri

387 **Physical modelling of thermal effects on steel flow and mixing in tundish** A. K. Sinha and A. Vassilicos

394 **Analysis of bulging and strain for continuously cast slab as thermoelastic continuous beam** J. Ren and Z. Wang

398 **Argon determination in steel samples using ultrahigh vacuum system** A. A. Kamperman, O. Dankert, A. van Veen, and K. T. Westerduin

403 **Modelling of electromagnetic brake and its influence on bubble entrapment** R. H. M. G. Nabben, R. P. J. Duursma, A. A. Kamperman, and J. L. Lagerberg

417 ***'Engineering for success' paper*** **Backward integration at Tuscaloosa** R. A. Knights

422 ***'Engineering for success' paper*** **The route of an East German steel company from planned to market economy: restructuring measures for achieving competitiveness** K. Döring and G. Naumann

426 ***'Engineering for success' paper*** **R&D as an engineering tool for steel's future** R. Boom

435 **Process plant implications of ULSAB and high strength autobody steels** R. Alderdice and E. A. Campbell

443 **Reduction kinetics of iron ore–coal pellet during fast heating** Q. Wang, Z. Yang, J. Tan, W. Li, and J. Sun

448 **Effect of centre coke charging on shape of deadman in blast furnace** S. K. Jung, Y. J. Lee, and W. S. Chung

453 **Mathematical model for powder injection refining of steel melt** S. C. Koria and K. S. Rao

460 **Kinetics of carbon dissolution in Fe–C alloy at 1550°C** N. W. Jones

466 **Thermochemical analysis of production of ferrochromium in submerged arc furnace** S. Ranganathan

472 **Curved mould for 115 × 115 mm continuously cast billet** D. Zhang, D. Gao, Y. Yu, and Y. Shun

476 **Taper design in continuous billet casting using artificial neural networks** J. H. Zietsman, S. Kumar, J. A. Meech, I. V. Samarasekera, and J. K. Brimacombe
